

WHY GAMMATRON

Half a century of sealed-source expertise.

Since 1973, Gammatron has done one thing — and all of it. Here's why operators trust us with their sources, from first design to final retirement.

50+

YEARS'
EXPERTISE

8

STAGES,
IN-HOUSE

1

ACCOUNTABLE
PARTNER

The complete loop

Most vendors handle a single step. We own **all eight** — design through disused-source processing, under one roof and one chain of custody.

Licensed & controlled

Sources fabricated, transported, and processed under **licensed, regulated** conditions — start to finish.

In-house and on site

Our own Houston facilities, plus **mobile encapsulation** that comes to your location when the source can't travel.

Proven worldwide

Trusted by the operators, labs, and manufacturers that depend on sealed sources — **around the world.**

Let's talk.

Tell us where your source is in its life. We'll take it from there.

Every sealed source has a life — and since 1973, we've seen it through all of it: designed, built, stored, shipped, tested, encapsulated, recycled, and responsibly retired. That's the whole of what Gammatron does, and all we do.

SEALED SOURCE LIFECYCLE MANAGEMENT

Comprehensive Sealed Source Solutions

One partner, every step.

Sealed sources designed, built, and cared for in Houston since 1973.

One partner, every step.

THE LIFECYCLE

Eight stages, one accountable team.

01 Design

Sources engineered to your application — isotope, activity, geometry, and housing.

02 Manufacturing

Precision fabrication and assembly under licensed, controlled conditions.

03 Storage

Secure, tracked storage of sources and devices, ready when you need them.

IN MOTION & VERIFIED

Handled, moved, and proven safe.

04 Logistics

Licensed transport and full chain-of-custody movement, door to door.

05 Leak Testing

Certified wipe testing that confirms source integrity and keeps you audit-ready.

06 Encapsulation

Special Form and Normal Form, welded or non-welded, in-house or on site.

CLOSING THE LOOP

Recovered, reused, retired.

07 Recycling

Recovery and reuse of valuable isotopes, cutting waste, lead time, and cost.

08 Disused Source Processing

Responsible management and retirement of sources at end of life.

One partner, every step.

That's the whole of what Gammatron does, and all we do.
