

SEALED SOURCE LEAK TEST ANALYSIS

Leak Testing

Professional leak testing for radioactive sealed sources, worldwide — a straightforward program that keeps you audit-ready, from kit delivery and sample analysis to fast reporting and long-term compliance support.

Every sealed source on your license needs periodic leak testing to confirm it isn't releasing radioactive material — **meeting regulatory requirements, protecting your team and environment, and proving the source is intact.**

HOW IT WORKS

1

Order Your Kit

Order online, or subscribe for automatic delivery at your interval.

2

Kit Ships to You

A ready-to-use kit arrives with the swab, return envelope, and form.

3

Collect the Sample

Wipe the source and housing using the step-by-step guide.

4

Send It Back

Seal the swab in the envelope and return it by any carrier.

5

Certified Analysis

Our lab analyzes to documented procedures — results in 48 hours.

6

Portal & Certificates

Access certificates and audit-ready reports in your client portal.
