AM-241/BE NEUTRON SOURCE MANUFACTURING

# Manufacturing

Every source we build runs on structured quality systems and documented process control — material handling, assembly, inspection, and verification, each stage traceable to spec. Our core expertise is Am-241/Be neutron sources, engineered to perform for the long haul.

Fifty years of building sealed neutron sources — **and never a single field failure.** Every build is traceable to spec, from first consultation to final delivery.

## OUR MANUFACTURING PROCESS

1

### Understand the Need

Request & consultation to scope your source.

2

### New or Recycle

We determine the right path for your source.

3

### Engineer to Spec

Designed to your isotope, activity, and housing.

4

### Source, Fabricate, Weld

Precision build under controlled conditions.

5

### Verify Throughout

Quality assurance at every stage.

6

### Package & Deliver

Packaged to spec and shipped worldwide.

50+

YEARS OF  
OPERATION

0

FIELD FAILURES,
